### About this Manual

The Manual includes instructions for using and managing the Product. Pictures, charts, images and all other information hereinafter are for description and explanation only. The information contained in the Manual is subject to change, without notice, due to firmware updates or other reasons. Please find the latest version of this Manual at the HIKMICRO website ( <http://www.hikmicrotech.com> ) company website.

Please use this Manual with the guidance and assistance of professionals trained in supporting the Product.

### Trademarks

YOU SHALL NOT USE THIS PRODUCT FOR ANY PROHIBITED END-USES, INCLUDING THE DEVELOPMENT OR PRODUCTION OF WEAPONS OF MASS DESTRUCTION, THE DEVELOPMENT OR PRODUCTION OF CHEMICAL OR BIOLOGICAL WEAPONS, ANY ACTIVITIES IN THE CONTEXT RELATED TO ANY NUCLEAR EXPLOSIVE OR UNSAFE NUCLEAR FUEL-CYCLE, OR IN SUPPORT OF HUMAN RIGHTS ABUSES.

IN THE EVENT OF ANY CONFLICTS BETWEEN THIS MANUAL AND THE APPLICABLE LAW, THE LATTER PREVAILS.

## Symbol Conventions

The symbols that may be found in this document are defined as follows.

Symbol	Description
 <b>Danger</b>	Indicates a hazardous situation which, if not avoided, will or could result in death or serious injury.
 <b>Caution</b>	Indicates a potentially hazardous situation which, if not avoided, could result in equipment damage, data loss, performance degradation, or unexpected results.
 <b>Note</b>	Provides additional information to emphasize or supplement important points of the main text.

## **Chapter 1 Introduction**

The client is used to view and analyze images captured by the acoustic imaging camera. The acoustic imaging camera as a professional acoustic localization product can easily locate gas leakage and partial discharge in the industrial environment. The client helps to analyze images, locate problems, detect potential risks, debug to a large extent, as well as reduce device faults and extra cost from breakdowns.

## Chapter 2 Settings

### 2.1 Switch Language

#### Steps

1. On the top left corner, click **Settings** → **Language** to select a language.
- 

#### Note

The new language will take effect after you restart the client.

---

### 2.2 Switch Distance Unit

#### Steps

1. On the top left corner, click **Settings** → **Distance Unit** .
2. Select a unit as needed.
3. Click **OK**.

### 2.3 Leak Cost Calculation

#### Steps

1. On the top left corner, click **Settings** → **Leak Cost Calculation Settings** .
2. Select a **Currency**, enter a **Unit Price**, and select a **Cycle** for calculation.
3. Click **OK**.

## Chapter 3 Help

You can view the client version information and get the contact of technical support.

### 3.1 Feedback

On the top left corner, click **Help → Feedback** to get the contact of technical support for any problems.

### 3.2 About

On the top left corner, click **Help → About** to view the client version No., open source license, etc.

## Chapter 4 Image Analysis

### 4.1 Navigation for Image Analysis Page (Gas Leakage)

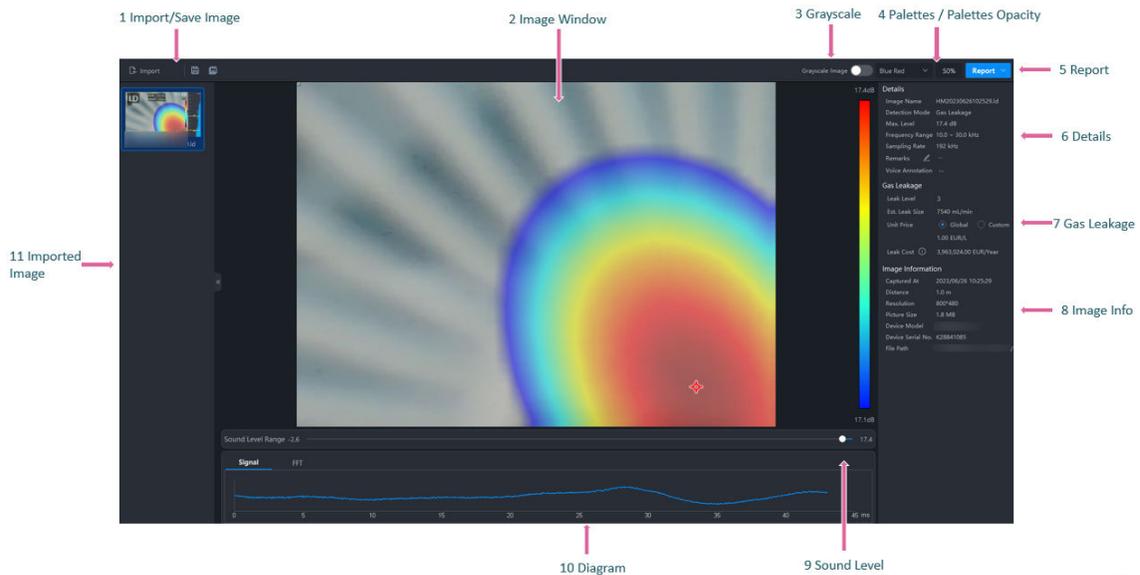

Figure 4-1 Image Analysis Page

- 1-Import acoustic images to the software to analyze the gas leakage severity. Supports saving analyzed images to the local PC.
- 2-Displays the enlarged image to be analyzed.
- 3-Enable/disable the grayscale image function.
- 4-Adjust the palettes opacity.
- 5-After analysis, supports exporting the report to the local PC.
- 6-View detection details. Supports adding text annotation for the image.
- 7-View the leak level, estimated leak size, and the leak cost. For details about setting the leak cost calculation, refer to **Leak Cost Calculation** .
- 8-View image information, such as capture time and image size.
- 9-Supports adjusting the sound level.
- 10-View the diagrams generated by the software.
- 11-List of imported images.

## 4.2 Navigation for Image Analysis Page (Partial Discharge)

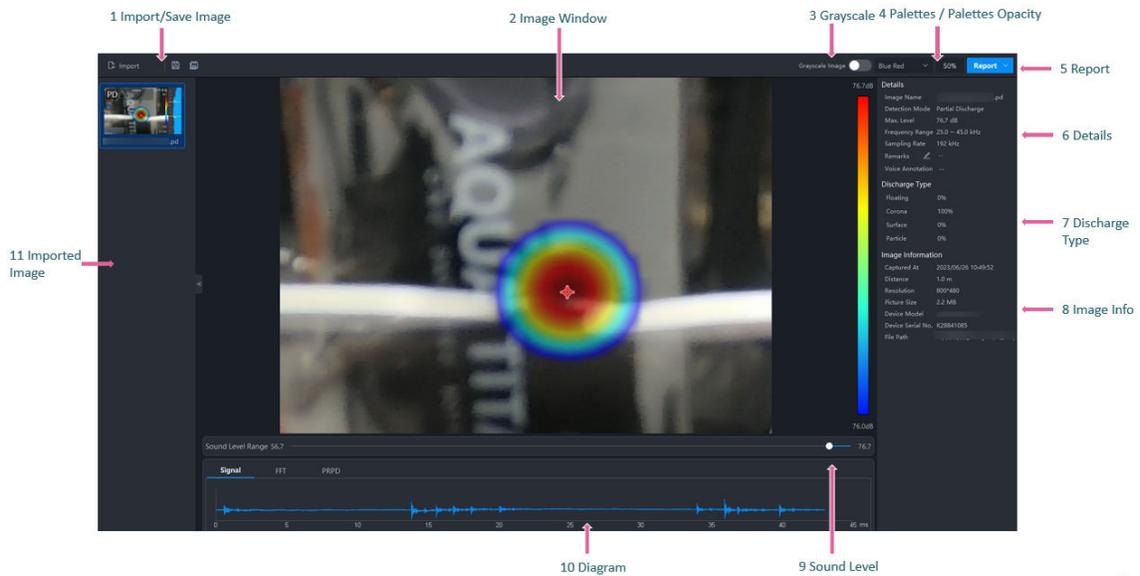

Figure 4-2 Image Analysis Page

- 1-Import acoustic images to the software to analyze the partial discharge severity. Supports saving analyzed images to the local PC.
- 2-Displays the enlarged image to be analyzed.
- 3-Enable/disable the grayscale image function.
- 4-Adjust the palettes opacity.
- 5-After analysis, supports exporting the report to the local PC.
- 6-View detection details. Supports adding text annotation for the image.
- 7-View the details of discharge types.
- 8-View image information, such as capture time and image size.
- 9-Supports adjusting the sound level.
- 10-View the diagrams generated by the software.
- 11-List of imported images.

## 4.3 Import Image

You can import acoustic images to the software to analyze them.

### Steps

1. In the top-left corner, click **Import**.
2. Select one or more acoustic images to be imported.

The imported acoustic images will be displayed on the left.

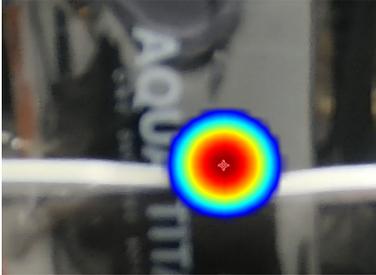

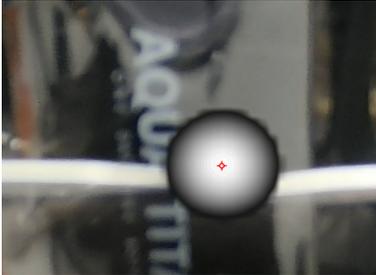

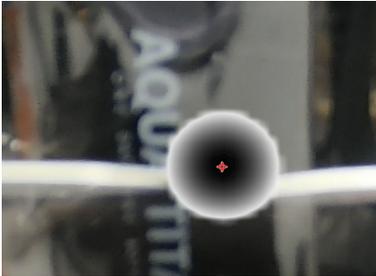

## 4.4 Palettes

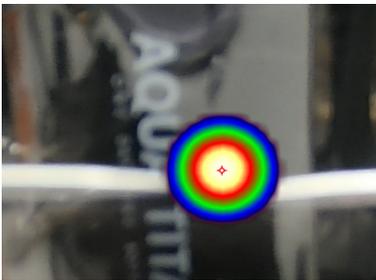

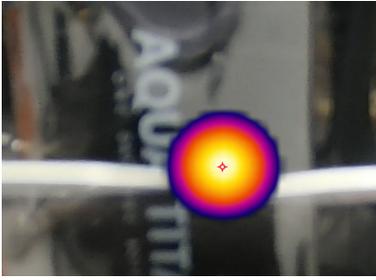

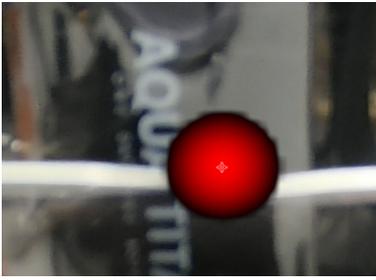

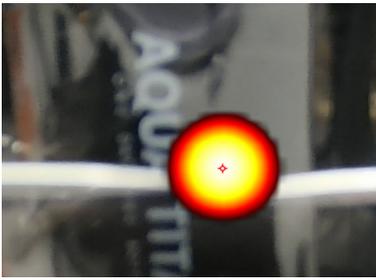

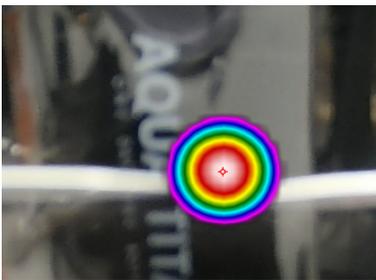

Palette is a method to transform the display of images from black and white into colorful ones. Since human eyes are not sensitive to the resolution of black and white images, palette processing can transform different grey-scales in the black and white images into different colors according to linear or nonlinear mapping function, thereby enhancing the recognizability of the image boundary, improving the capability of human eyes to identify details of the image and allowing users to obtain information hidden in the grey-scale image that cannot be directly observed by naked eyes. Palettes mode is the color displaying mode of the transformed image, which can be manually set on the client.

### Set Palettes

In the top-right corner, select a palette type in the drop-down list.

### Palettes

Palettes	Image Example
Blue Red	
Black White	
White Black	

Palettes	Image Example
Rainbow	 A grayscale image of a white horizontal line with a circular heatmap overlay. The heatmap uses a rainbow color palette, showing a central red core transitioning through yellow, green, and blue to a purple outer ring. A small white crosshair is centered on the heatmap.
Ironbow	 A grayscale image of a white horizontal line with a circular heatmap overlay. The heatmap uses an 'Ironbow' palette, showing a central red core transitioning through orange and yellow to a purple outer ring. A small white crosshair is centered on the heatmap.
Black Red	 A grayscale image of a white horizontal line with a circular heatmap overlay. The heatmap uses a 'Black Red' palette, showing a central red core with a black outer ring. A small white crosshair is centered on the heatmap.
Fusion	 A grayscale image of a white horizontal line with a circular heatmap overlay. The heatmap uses a 'Fusion' palette, showing a central red core transitioning through yellow and orange to a black outer ring. A small white crosshair is centered on the heatmap.
Rain	 A grayscale image of a white horizontal line with a circular heatmap overlay. The heatmap uses a 'Rain' palette, showing a central red core transitioning through yellow, green, and blue to a purple outer ring. A small white crosshair is centered on the heatmap.

### **4.5 Adjust Acoustic Palette Opacity**

You can adjust acoustic palette opacity to see more details of a target.

In the top-right corner, click the percentage and drag the slider to adjust the opacity.

### **4.6 Adjust Sound Level Range**

Drag the slider to adjust the sound level range as needed. The acoustic palettes will change with adjustment.

## Chapter 5 Save Image

On the top left corner, click  or  to save or save as the image.

## Chapter 6 Export Report

On the top right corner, click **Report** and select a method to export a report as needed.

### **Export Current Page**

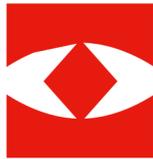

Select **Export Current Page**:

Export a report of the current image.

### **Batch Export**

Select **Batch Export**:

Select one or multiple images to export a report.
